Together we can increase cancer survival rates for 15 to 39 year olds.

Do you know there is an adolescent and young adult cancer segment called AYA?

Every year in the United States 70,000 AYAs are diagnosed with cancer. Over the past two decades their survival rates have not increased. SeventyK is fighting to change that!

Use this kit to “Stop A Doc” and make a difference!

Go to SeventyK.org to find out more about adolescent and young adult (AYA) cancers and their treatment.

Join the SeventyK.org/WellnessNetwork to connect with patients and healthcare professionals - become a part of the conversation.
Instructions:
Cut out and use this hand to **Stop a Doc!** Can your Doc answer “Yes” to these questions?

1. Do you know that there is an adolescent and young adult cancer segment called AYA?
2. Are you aware of the unique physical, psychological and social needs of AYAs?
3. Do you know if there are clinical trials for AYAs?
4. Can you refer AYA patients to AYA specific resources?
5. Do you treat AYA patients and, if so, do you have academic and clinical experience treating 15-39 year old cancer patients?
Instructions:
This is the back.
Cut out and customize your Stop A Doc hand!
